CONTENT ANALYSIS OF THE PAPERS IN THE RESEARCH REPORTS vol. 89, no. 1

VSEBINSKA OBDELAVA PRISPEVKOV V ZBORNIKU let. 89, št. 1

Tomaž (Tomaz) BARTOL[a], Karmen STOPAR[b]

SUBJECT INDEX BY AGRIS CATEGORY CODES

VSEBINSKO KAZALO PO SKUPINAH ZNANJA (PREDMETNIH KATEGORIJAH)

	CC	pp
History	B50	189–206
Documentation and information	C30	129–135
Org., admin. and manag. of agric. enterprises or farms	E20	81–93, 115–128
Rural sociology	E50	115–128, 221-232
Rural population	E51	81–93
Trade, marketing and distribution	E70	221-232
Consumer economics	E73	221-232
Agrarian structure	E90	189–206
Crop husbandry	F01	15–23, 35–43, 107–114, 129–135
Fertilizing	F04	51–58, 59–63, 65–71
Cropping patterns and systems	F08	81–93
Plant genetics and breeding	F30	233-245
Plant ecology	F40	147–157, 233-245
Plant structure	F50	25–33, 137–145, 147–157, 233-245
Plant physiology and biochemistry	F60	73–79, 247-259
Plant physiology - Nutrition	F61	45–49, 51–58, 59–63, 65–71, 107–114, 147–157
Plant physiology - Growth and development	F62	35–43, 45–4945–49, 59–63, 65-71, 107–114
Plant taxonomy and geography	F70	137–145
Pests of plants	H10	5-13, 25–33, 95–102, 103–106, 173-187
Forestry production	K10	189–206
Animal ecology	L20	95–102
Nature conservation and land resources	P01	247-259, 115–128, 137–145, 207–220

[a] Assoc. Prof., Ph. D., M. Sc.., B. Sc., Jamnikarjeva 101, SI-1000 Ljubljana, P. O. Box 95

[b] B.Sc., M.Sc., ibid.

Water resources and management	P10	207–220, 261–269, 281-289, 291–302
Soil science and management	P30	281-289, 291–302
Soil chemistry and physics	P33	261–269
Soil biology	P34	35–43
Meteorology and climatology	P40	159–171
Food processing and preservatio	Q02	271–279
Food composition	Q04	247-259, 271–279
Human nutrition - General aspects	S01	73–79
Pollution	T01	207–220, 261–269, 291–302
Mathematical and statistical methods	U10	159–171
Research methods	U30	129–135, 281-289

SUBJECT INDEX BY AGROVOC DESCRIPTORS

PREDMETNO KAZALO PO DESKRIPTORJIH AGROVOC

DE	pp
aesculus	95–102
aesthetic value	137–145
agricultural structure	189–206
alliumcepa	107–114
alternative agriculture	81–93
antimicrobial properties	73–79
Antioxidants	65–71
Atrazine	261–269
Azotobacter	107–114
Bacteria	73–79
Bark	261–269
Basella	59–63
Biochemistry	247-259
Biodiversity	247-259
Biofertilizers	59–63
biological control	173-187
Bioremediation	291–302
Boron	51–58, 291–302
Branching	59–63
brassica oleracea	15–23, 25–33, 129–135
Buckwheat	271–279
Buds	51–58
Bulbs	107–114
Cabbages	129–135
Carbohydrates	25–33
Carbondioxide	147–157
Casestudies	159–171
cereal products	271–279
Chemotaxonomy	247-259
Chrysomelidae	173-187
Cichoriumendivia	35–43
Classification	129–135
Climatology	159–171
Coleoptera	173-187
Colour	233-245, 247-259

commodity markets	221-232
common lands	189–206
communal forests	189–206
Composts	261–269
Coniferales	261–269
consumer behaviour	221-232
consumer expenditure	221-232
conventional tillage	35–43
cost analysis	107–114
crop losses	15–23
crop management	35–43
Cropyield	15–23, 35–43, 107–114
Crossbreds	233-245
Cultivation	35–43
cultural behaviour	221-232
cultural values	115–128
Curculionidae	173-187
Cuttings	45–49
Damage	15–23, 25–33
Daylight	45–49
Degradation	261–269
Demand	221-232
Dimensions	107–114
Dimensions	15–23, 35–43, 59–63
drug plants	73–79
Efficiency	5-13, 107–114
environmental factors	5-13, 65–71
environmental protection	81–93, 115–128
Equipment	281-289
Evaporation	147–157
Expenditure	221-232
Experimentation	159–171
fagopyrum esculentum	271–279
fagopyrum tataricum	271–279
family budget	221-232

farm surveys	81–93
Farmland	207–220
feeding habits	221-232
Fertilization	51–58
fertilizer application	51–58, 59–63
Fertilizers	207–220
Feudalism	189–206
Flavour	271–279
Flowers	51–58
foliar application	51–58, 59–63
food consumption	221-232
Foods	221-232
Forests	189–206
Fructose	25–33
Fruit	247-259
Fruits	51–58
Gasexchange	147–157
gene banks	233-245
genetic markers	233-245
geographical distribution	95–102
Glucose	25–33
Grafting	45–49, 103–106
Grapevines	45–49, 247-259
Greenhouses	103–106
Groundwater	207–220
groundwater pollution	207–220, 261–269
growt hrate	35–43
Growth	107–114
Guargum	271–279
Herbicides	261–269
Heterorhabditis	5-13
History	189–206
household consumption	221-232
human behaviour	81–93
Identification	95–102, 129–135, 137–145
Infection	95–102, 103–106
Infestation	25–33
insect control	173-187
intensive farming	207–220
interdisciplinary research	129–135
Irrigation	207–220, 291–302
Kernels	233-245
land economics	189–206
land fills	291–302
land ownership	189–206
land reform	189–206
land resources	115–128, 189–206
land varieties	233-245, 247-259
Landscaping	137–145
Larvae	5-13
Leachates	291–302
Leaching	207–220, 261–269, 291–302
Leafarea	45–49
Leaves	73–79

Lepidoptera	95–102
living standards	221-232
lycopersicon esculentum	103–106
Management	189–206
Measurement	281-289
measuring instruments	281-289
meloidogyne javanica	103–106
Menthapiperita	73–79
Metabolites	261–269
Meteorology	159–171
Methods	137–145, 159–171, 281-289
Monitoring	95–102
Mortality	5-13
Motivation	81–93
Mycorrhizae	35–43
national parks	115–128
natural resources	115–128
nature reserves	115–128
Nematoda	103–106, 173-187
Newspapers	129–135
Nitrates	207–220
nitrogen fertilizers	107–114
Nomenclature	129–135
noncereal flours	271–279
organic agriculture	35–43, 81–93
organoleptic properties	271–279
ornamental value	137–145
ornamental woodyplants	137–145
Ownership	189–206
Oxidation	65–71
Pasta	271–279
Pathogens	73–79
pest insects	95–102
pest resistance	25–33
Pestcontrol	173-187
Photooxidation	65–71
physiological functions	147–157
plant anatomy	137–145, 233-245, 247-259
plant extracts	73–79
plant habit	137–145
plant nutrition	51–58, 59–63, 65–71
plant population	233-245
Plantago	271–279
political systems	189–206
pollution control	291–302
Precipitation	207–220
price elasticities	221-232
processed plant products	271–279
prunus avium	51–58
Quality	15–23, 271–279, 247-259
random mating	233-245
Redwines	247-259
Research	129–135

resistance to injurious factors	65–71
right of access	189–206
Roots	45–49
Rootstocks	45–49
rural areas	115–128
Salix	291–302
Scarabaeidae	173-187
Scions	103–106
Selenium	65–71
senescence	65–71
shrubs	137–145
silvanidae	173-187
sociocultural environment	115–128
soil pollution	207–220, 261–269
soil profiles	261–269
soil transport processes	207–220
soil water content	281-289
soil water potential	281-289
spacing	15–23
statistical data	159–171
statistical methods	159–171
steinernema feltiae	5-13
stems	45–49, 59–63
stomata	147–157
stress	65–71

sucrose	25–33
surveys	81–93
sustainability	35–43, 81–93
taxonomy	129–135
technological changes	81–93
terminology	129–135
thripidae	5-13
thrips (genus)	5-13, 15–23, 25–33
thrips tabaci	15–23
thrips tabaci	25–33
thysanoptera	5-13
tourism	115–128
traditional uses	81–93
transpiration	45–49, 147–157
trees	137–145
urban wastes	291–302
value systems	81–93, 115–128, 137–145, 221-232
vitis vinifera	45–49, 247-259
waste disposal	291–302
water	45–49
water metabolism	65–71
water resources	207–220
winegrapes	247-259
zea mays	233-245
